Quarterly Financial Report

3rd QUARTER

Nine months ended

November 30,

2010

Manitoba Public Insurance

Management Discussion and Analysis

Management's discussion and analysis provides a review of the financial results and future outlook of Manitoba Public Insurance. It should be read in conjunction with the unaudited financial statements for the third quarter ended November 30, 2010 included herein and the annual audited financial statements and supporting notes included in the Corporation's 2009 Annual Report. Certain information in this report may consist of forward-looking statements. These statements are based on various techniques and assumptions including predictions about future events which may not occur. Actual results could deviate significantly from the forward-looking statements.

Goal 1

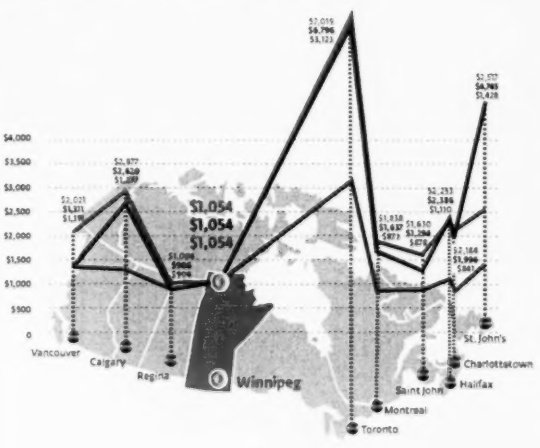
Universally available mandatory protection against the cost of automobile accidents. Rates, on average, will be lower than those charged by private insurance companies for comparable coverage and service.

Why? One reason for our creation was to deliver the best insurance value to Manitobans. This is the essence of our continuing success.

- 21-year-old male, 5 year clean driving record
- 40-year-old couple both with 15-year clean driving records, and 16-year-old son who's accident-free
- 35-year-old couple both with 15-year clean driving records

Rates based on:
2005 Toyota Corolla CE
(4 door, 4 cylinders, 2 wheel drive), $500 All Perils deductible, $2 million third-party liability

Among the lowest rates in Canada



Goal 2

The Basic plan will return at least 85% of premium revenue to Manitobans in the form of claims benefits.

Why? Over the long-term, returns within this range strike the right balance. We pay back to Manitobans substantially more of their premiums than would private insurers, while keeping a sound financial footing.

Premium returned for each dollar earned

Goal 3

Manitoba Public Insurance will be a leader in automobile insurance and vehicle and driver licensing, providing Manitobans with superior products, coverage and service.

Why? By measuring key performance indicators, we can track the public's view of our performance.

Goal 4

Manitoba Public Insurance will provide service that is responsive, fair, courteous and convenient. Manitoba Public Insurance will meet customer service standards that are based on customer expectations.

Why? We value our customers and put their interests first. Also, Manitobans expect more from us than from private insurers, because Manitoba Public Insurance is their company. We believe their higher expectations are justified.

Overall, how often do we meet/ exceed standards

Goal 5

Retained Earnings and Rate Stabilization Reserve will be maintained within established target levels.

Why? Our long-term objective is to break even financially and to be financially self-sufficient. Maintaining the RSR within its target range helps us control rates when claim costs rise substantially. Manitobans deserve stable, affordable premiums over the long term.

Goal 7

Manitoba Public Insurance will lead driver and vehicle safety initiatives that reduce risk and protect Manitobans, their streets and their neighbourhoods. Manitobans will recognize the Corporation is living its mission.

Why? Pursuing traffic safety and loss-prevention programs reflects our long standing commitment to the well-being of Manitobans and to affordable auto insurance. Manitobans have told us they support these efforts.

Results of Operations

Manitoba Public Insurance reported net income of $91.4 million for the nine months ended November 30, 2010 compared to net income of $24.9 million for the same period last year. This includes net income of $74.3 million (2009 – net income of $15.9 million) from the Basic insurance line of business. Net income increased from the previous year by $66.5 million due to improved underwriting results of $54.0 million and a $12.5 million rise in investment income.

Current Year and Last Year

Total earned revenues for the nine months increased from the previous year by $16.4 million. This increase is attributed to motor vehicle earned revenues which increased by $21.4 million or 3.4 per cent due mainly to increases in the number and value of vehicles insured.

Claims costs for the nine months ended November 30, 2010 decreased by $40.6 million or 6.6 per cent compared to last year. Bodily injury claims incurred decreased by $67.2 million and physical damage claims incurred rose by $23.9 million. The significant decrease in bodily injury claims incurred is mainly attributable to claims of prior years which declined by $67.1 million due to favourable development (see Financial Statements Note 3). The rise in physical damage claims costs is related in part to increased hailstorm activity in the current year. Major hailstorms hit the province in both August, 2009 and 2010. The August 13 and 14, 2009 hailstorm struck southern Manitoba, including Winnipeg, Brandon and Steinbach regions, resulting in over 10,000 claims with an estimated value of $35.0 million. Manitoba Public Insurance holds reinsurance coverage against this loss which will limit its exposure to $13.3 million. The August 20, 2010 hailstorm struck Winnipeg resulting in over 4,000 claims with an estimated value of $13.5 million. Furthermore, in the current year, a rise in minor hailstorm activity has resulted in an increase in claims incurred of $8.9 million.

On December 4, 2009, the Public Utilities Board (PUB) released its ruling on the Corporation's rate application for the 2010/11 fiscal year. Effective March 1, 2010, overall average Basic insurance rates remain unchanged from the previous year. The ruling means that Manitoba Public Insurance has held the line or reduced auto insurance rates 11 of the last 12 years, without lowering service or reducing coverage.

Retained Earnings

Retained earnings of $449.8 million (2009 - $296.4 million) are comprised of $299.0 million for Basic insurance (2009 - $152.9 million) and $150.8 million for competitive lines (2009 - $143.5 million). The Basic insurance retained earnings are allocated entirely to the Rate Stabilization Reserve and the Competitive Lines retained earnings are allocated to retained earnings $110.6 million and the Extension Development Fund $40.2 million.

The Corporation established on March 1, 2007, the Extension Development Fund (EDF), by appropriating retained earnings from the Competitive Lines in excess of the most recent year's target that were established using the Dynamic Capital Adequacy Test. The EDF was established to defray the costs of projects undertaken to maximize the opportunities presented by the 2004 merger of Manitoba Public Insurance and the Division of Driver and Vehicle Licensing. Activity for the nine months ended November 30, 2010 has reduced the EDF by $8.1 million to $40.2 million.

Change in Accounting Policy

Effective for fiscal years beginning on or after October 1, 2008 the Accounting Standards Board issued new CICA Handbook Section 3064 *Goodwill and Intangible Assets* which replaced Section 3062 *Goodwill* and *Other Intangible Assets* and Section 3450 *Research and Development Costs*, and made amendments to Section 1000 *Financial Statement Concepts*. The new Section 3064 and amendments to Section 1000 are effective for Manitoba Public Insurance's 2009/10 fiscal year and require retroactive application resulting in a restatement of previously reported balances for the nine months ended November 30, 2009.

As a result of adopting the new standard requiring intangible assets to provide an economic return, the Extension Development Fund was decreased by $17,846,000 to $41,579,000 as at February 28, 2009 and by $7,221,000 to $50,511,000 as at November 30, 2009. Operating expenses were increased by $7,221,000, resulting in Corporate net income being restated from $32,141,000 to $24,920,000 and Competitive Lines net income being restated from $16,208,000 to $8,987,000 for the nine months ended November 30, 2009.

Outlook

The Corporation remains committed to achieving its seven Corporate goals. Actual results will be monitored, and corrective actions taken when necessary, to ensure that expected outcomes are realized.

On December 8, 2010, the Public Utilities Board (PUB) released its ruling on the Corporation's rate application for the 2011/12 fiscal year. Effective March 1, 2011, overall average Basic insurance rates will decrease by 4.0 per cent from the previous year. The PUB ruling also ordered a 10 per cent premium rebate of 2009/10 Basic vehicle premiums, estimated to be $71.5 million, subject to the PUB's further approval.

Current projections indicate the Corporation is expected to realize net income of approximately $70.3 million during the current fiscal year. This has increased from the projected net income of $5.6 million that was expected at the beginning of the fiscal year.

Notes to Financial Statements

1 Certain of the comparative figures have been reclassified to conform with the current period financial statement presentation.

2 These interim financial statements:
- should be read in conjunction with the corporation's 2009 Annual Report including the financial statements and supporting notes.
- have been prepared following the same accounting policies that are disclosed in the corporation's 2009 Annual Report.

3 The provision for unpaid claims, including adjustment expenses, is subject to variability. This variability is related to future events that arise from the date the loss was reported to the ultimate settlement of the claims. Accordingly, short-tail claims such as physical damage claims tend to be more reasonably predictable than long-tail claims such as Personal Injury Protection Plan and public liability claims. Factors such as the receipt of additional claims information during the claims settlement process, changes in severity and frequencies of claims from historical trends, and effects of inflationary trends contribute to this variability.

The determination of the provision for unpaid claims, including adjustment expenses, relies on judgment, analysis of historical claim trends, investment rates of return and expectation on the future development of claims. The process of establishing this provision necessarily involves risks which could cause the actual results to deviate, perhaps substantially, from the best determinable estimate.
